BUY A BRICK CAMPAIGN

**HELP US CONSTRUCT A COMMUNITY CENTRE IN THE JORDAN VALLEY
AND CHANGE THE LIVES OF HUNDREDS OF PALESTINIANS**

Eco-friendly mud bricks from local materials using ancient building methods

We are fund-raising to construct a community centre that will serve 13 traditional herding communities. Ten thousand bricks are needed for this centre that will be built in October 2018 during a solidarity project with internationals recruited through ICAHD chapters and Torat Tzedek supporters who will work alongside locals from the Jordan Valley Solidarity Campaign.

The centre will be used for:

- educational activities such as pre-school sessions
- a meeting place for women to create a network of support and where they can develop their interests
- cultural events like singing and dancing activities and arts and crafts workshops involving all the family
- strategy meetings to strengthen their communities and their resistance to displacement

"With your support, this construction will help raise international awareness about the struggle of these herding communities to exist, the structural causes of their suffering and how they are also a part of the international movement to allow Palestinians their right to self-determination. Practical international solidarity directly challenges the Israeli strategy of isolating the community both physically and psychologically. If possible, also join the camp because the personal relationships which develop during time spent working with the communities becomes a source of strength and motivation for all involved." Rasheed Khudairy, Director, Jordan Valley Solidarity Campaign.
